- (1) Option 1 Fee is shown for informational purposes only. This is the full fee which could be legally assessed in FY2007 based on the Transportation Impact Fee Study dated August 25, 2006. This fee includes interstate, interchange and carrying costs.
- (2) Specific calculations for the "low income" category can be seen in Appendix D of the Transportation Impact Fee Update Study.
- (3) The statistical relationship between the trip generation rate for the age restricted single family, age restricted multi-family, and congregate care facility was used to interpolate the trip length.
- (4) The trip generation rate recommended for the office and retail less than 50,000 sf categories used the end-point of the range due to the nature of the ITE equation to be conservative for smaller developments.
- (5) The trip generation rate recommended for all other office and retail tiered categories used the mid-point of each range due to the consistency of the ITE equation.
